Pioneer Pump, Inc. Names Ryan Briscoe Controller

CANBY, Ore; January 4, 2012 – Pioneer Pump, manufacturers and designers of centrifugal pumps with exceptional efficiency and uncompromising reliability, has named Ryan Briscoe as its new Controller. Pioneer Pump created this new position in response to continued year-over-year sales increases.

Mr. Briscoe, who had been Plant Manager and Controller IntelliCoat Technologies[®], will manage the finance department and direct the upcoming enterprise resource planning (ERP) implementation. Mr. Briscoe further strengthens Pioneer Pump's management team, and will establish system level processes to support projected company growth.

"Our monthly average inventory is running \$8 million higher than last year. We have purchased \$400K in computer systems. With these investments in company performance come the need for a higher level of on-sight management," noted Paul Schlumpberger, Vice President of Pioneer Pump, Inc. "Ryan Briscoe's comprehensive understanding of operational systems and financial analysis will provide the administrative direction needed to effectively manage our growth."

Before joining Pioneer Pump, Inc., Mr. Briscoe directed financial and operational activities for at IntelliCoat Technologies[®], where he implemented a new material requirements planning (MRP) system and improved operational performance. While at IntelliCoat Technologies[®], he was a key designer of a plant-wide engineering project that resulted in 15 years of continuous monthly profitability.

Pioneer Pump places a high value on the contribution of all its employees. Mr. Briscoe brings strong interpersonal skills in alignment with our company culture.

Mr. Briscoe is a Certified Public Accountant (CPA), an ISO 9002 Auditor and has a degree in Accounting from Portland State University.

He lives in Mulino, Oregon with his family and enjoys fishing, camping and golf.
